SUMMARY

UX/Product Designer with 6 years designing enterprise software, dashboards, and workflow applications end-to-end. At Meltwater, delivered measurable outcomes across multiple products – cutting alert creation time by 18%, reducing discovery time by 22%, increasing engagement by 28%, and improving time-to-action by 33% – through design sprints, usability testing, and iterative validation. Strong foundation in design systems, AI-driven workflow design, and cross-functional collaboration.

EXPERIENCE

Independent Design Practice, San Mateo, CA

07/2025 – Present

Pursuing UX/Product Designer opportunities following a company-wide layoff at Meltwater, while freelancing and deepening expertise in AI-assisted design, rapid prototyping, and enterprise workflow UX.

Meltwater, San Francisco, CA

05/2022 – 07/2025

Global SaaS leader in media monitoring, analytics, and intelligence

Product Designer

Led end-to-end UX design for Smart Alerts and the Universal Dashboard System, running rapid design sprints, building interactive prototypes for early validation, and presenting work to senior leaders across product phases:

- Redesigned alert selection and grouping logic – simplifying options, adding preview examples, and introducing search within the management table – improving ease-of-selection by 9%, cutting alert creation time by 18%, reducing discovery time by 22%, reducing support requests by 15%, and increasing user-reported confidence when selecting alert types.
- Designed predictive, AI-summarized alert forecasting that increased alert engagement by 28% and cut time-to-user-action by 33%, by surfacing context users previously had to find across multiple dashboards.
- Led usability research across 20+ FullStory sessions and customer interviews and collaborated with researchers on Lyssna usability tests – synthesizing insights into prioritized design improvements and partnering with PM on roadmap planning, including UX enhancements for forecasting, sensitivity scales, and sentiment shift visualizations.
- Built and shipped an AI-powered UX Writing Assistant, adopted by 50% of the design team and reducing UX writing effort by 40%.
- Contributed new reusable components and interaction patterns to Meltwater’s design system, ensuring consistency in visual design and UX terminology across platform touchpoints.
- Facilitated cross-functional stakeholder alignment workshops including sketching sessions, wireframe reviews, and prototype walkthroughs – driving shared decisions across PM, engineering, and business stakeholders.
- Created and coded UX prototypes for Slack and Microsoft Teams integrations using Insomnia, ensuring clarity, consistency, and adherence to product guidelines across external channels.
- Contributed to the redesign of Unified Dashboards – Meltwater’s cross-channel reporting platform combining paid, earned, and owned media – owning specific design areas alongside the lead designer, including AI-assisted widget patterns and enterprise workspace layouts.
- Contributed to UX design for Mira Studio, Meltwater’s AI-powered natural language interface that lets users query media data conversationally instead of building dashboards manually.

Greenbanc, Berkeley, CA

04/2020 – 05/2022

Leading provider of home energy analysis technology

UX/UI Designer

Served as primary designer for a multi-platform enterprise product suite, owning UX from discovery through handoff and building the company’s design foundation from scratch:

- Designed and shipped 100+ screens in Figma, translating complex workflow data into intuitive experiences – from low-fidelity wireframes through high-fidelity interactive prototypes – across web and desktop platforms.
- Owned the full product design lifecycle – discovery, workflow definition, high-fidelity design, prototyping, usability testing, and developer handoff – for a multi-platform product suite.
- Conducted user research and usability testing to identify friction points in energy analysis workflows and validate design decisions before development.
- Built the company’s first design system from scratch – component libraries, typography, iconography, color standards, and interaction patterns – establishing consistency across web, desktop, and admin platforms.
- Partnered directly with executive leadership and engineering to align user needs, technical constraints, and business priorities on a fast-moving early-stage product.

Private Consulting Practice, San Mateo, CA

03/2019 – 04/2022

Full-time 03/2019 – 04/2020; freelance alongside Greenbanc 04/2020 – 04/2022

Delivered UX/UI design for clients across Technology, HealthTech, Education, and Non-profit sectors, including enterprise workflow tools and complex multi-step applications:

- Designed the UI for uWork, a mobile application and CMS desktop platform for the construction industry.
- Led end-to-end UX/UI design for a wildfire survivor grant application review platform.
- Designed a tech collaboration platform for Silverberry.AI's browser extension app development, working across publisher-facing and consumer-facing surfaces in a digital distribution context.
- Co-designed an improved STEM curriculum and teacher experience alongside a team of UX designers.

TECHNICAL & DESIGN EXPERTISE

Product Design: End-to-End UX/Product Design, Interaction Design, Rapid Prototyping & Validation, Design Systems & Component Libraries, Information Architecture, Visual Design, AI-Driven Workflow Design

Research & Validation: Usability Testing & Validation Sessions, User Interviews, Design Sprint Facilitation, Stakeholder Workshops, Journey Mapping, Data-Informed Design

Tools: Figma, FigJam, Adobe Creative Suite, FullStory, Lyssna, Insomnia

AI Tools: ChatGPT, Claude, v0, Lovable – used for design analysis, content generation, and optimizing the design process through rapid prototyping and ideation

Collaboration & Handoff: Notion, Zeplin, Confluence, Jira

EDUCATION & PROFESSIONAL DEVELOPMENT

General Assembly

UX Design Certificate

San Francisco, CA

Shaw Academy

Graphic Design Certificate

Dublin, Ireland

Nizhny Novgorod State University

Bachelor and Master of Economics | Graduate Diploma in Interpreting & Translating

Nizhny Novgorod, Russia

ADDITIONAL

Awards: 4th place and Best B2C Project, Women in Tech Hackathon – Violet Hacks 2019.

Volunteering: San Francisco Design Week, Editorial Volunteer (2019) • Design x Us, UX Professional Interviewer (2021).
